

SPUTNIK NO. 2 PRESSURES IKE

President Is Urged To Call Session

Fear Grows That U. S. Is Behind In Death Missiles

(Related News on Page 12)
By Associated Press
LONDON, Nov. 4.—The Russians announced tonight they had discovered a secret source of power for launching their second earth satellite into space.

By United Press
WASHINGTON, Nov. 4.—Sputnik II raised new fears today that Russia, already first into space with a data-collecting projectile and a living animal, may pile up an unbeatable lead in death-dealing missiles.

Russia's second successful satellite prompted some congressional Democrats and scientists to voice new demands that President Eisenhower put the U. S. satellite-missile program on a "crash basis" in an attempt to wrest the initiative from the Soviets.

Call Special Session

Senator Joseph C. O'Mahoney, Wyoming Democrat, urged that Eisenhower call a special session of Congress.

But the Administration, which at first deprecated Sputnik I as a "neat scientific trick" and then subsequently ordered a speedup in the U. S. satellite-missile program, said Sputnik II came as no surprise. And Defense Secretary Neil H. McElroy said there would be no new speedup.

"We are already under a pressure program," McElroy said.

Department Silent

The White House said the launching of the second Russian satellite "had been anticipated since the Russians had announced it in advance." It said Eisenhower planned no special conferences.

The State Department declined comment on the new Soviet moon. But officials privately conceded the Russians will score a new propaganda victory with it and that they will reap an extra dividend.

Outside the Administration, Sputnik II was causing new alarms that U. S. security is dangerously threatened by Russia's demonstrated advances in rocketry and in crossing the frontiers of space.

'Putting Money First'

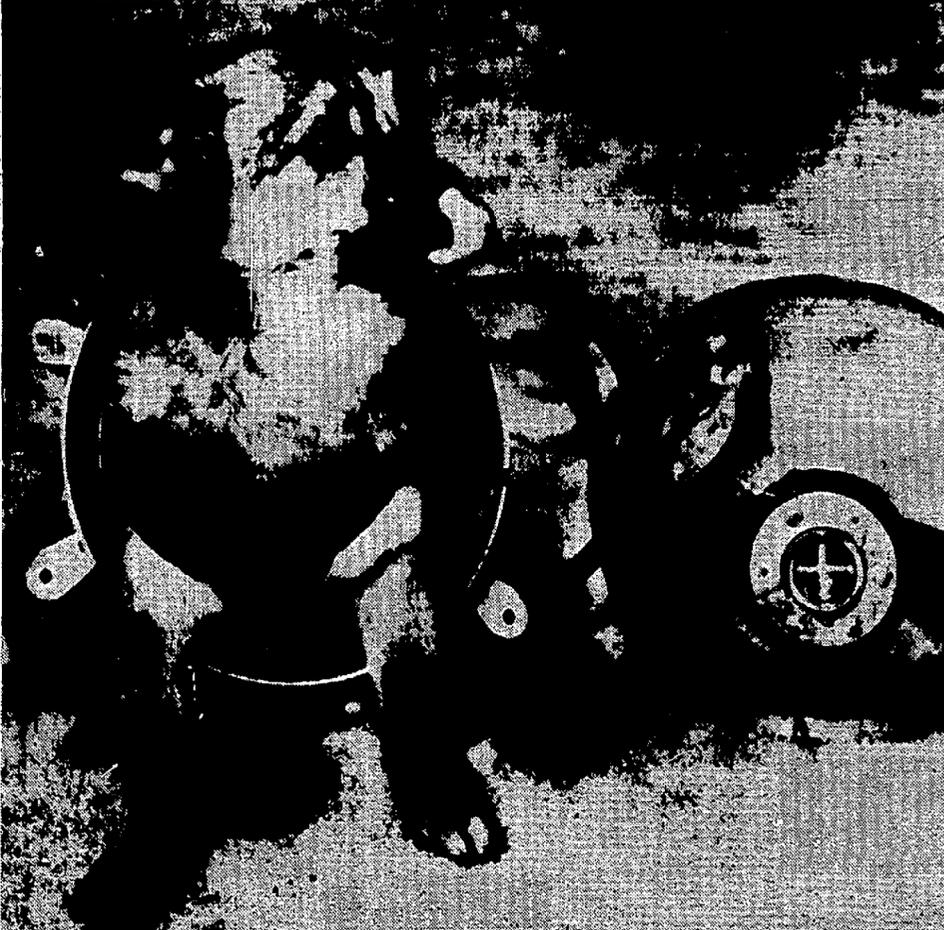

In calling for a special session of Congress, O'Mahoney charged that the Administration's policy of "putting money first and defense second is costing us the leadership of the world."

Senator Henry M. Jackson, Washington Democrat, a member of the Armed Services Committee, proposed that Eisenhower put the U. S. missile program under a "cezar" who would devote his full attention to it and launch a "bold program" for leading scientific training.

Dr. John Rinehart, associate director of the Smithsonian Astrophysical Laboratory at Cambridge, Mass., commented that "no matter what we do now, the Russians will beat us to the moon." He said he "wouldn't be surprised" if the Soviets sent a rocket to the moon "within a week."

Rocket Authority Willy Ley agreed there is nothing to prevent the Russians from sending an unarmored rocket to the moon. But he said the race to get a man there is still "wide open."

Ley said the United States is at (Continued on Page 10, Col. 2)

IS THIS TRIP NECESSARY? — This could be what "Malyshka," Russian "Space Dog," is thinking as he licks his chops apprehensively in his form-fitting space suit. Malyshka is a canine co-worker of "Limonchek" — Russian equivalent of the American term "Little Lemon" — the dog traveling in Russia's latest man-made satellite.

Costly Gems Fade With Pattersons

Jewelry, Watches Unreported Since Couple Vanished

By CLIFF SHERRILL
Investigators disclosed today that a small fortune in jewelry apparently disappeared with Mr. and Mrs. W. D. Patterson, missing from El Paso since March 6.

Friends of the Pattersons told investigators that the couple owned numerous items of expensive jewelry, including diamond rings and gold watches, and that these valuables apparently disappeared with their owners.

The significance of this information is that it could supply a motive for foul play — robbery and possibly murder to conceal the crimes.

It is an established fact that Mrs. Patterson possessed jewelry valued at thousands of dollars. The latest jewelry purchase she is known to have made in El Paso was a diamond ring valued in excess of \$2000. She is known to have owned numerous other high-priced gems. Her husband owned "one of the finest watches in El Paso," one of the City's leading jewelers said today.

"Pat was a particular man," the jeweler said. "He wanted a watch that would keep time to the second, and that was the kind of watch he owned — an expensive watch that we adjusted for him until it kept time with a chronometer."

The disclosure of the Pattersons' jewelry brought out another phase of "evidence" indicating the Pattersons disappeared by surprise (Continued on Page 10, Col. 3)

Swear In New Space Traveling Dog Aboard Russian Satellite

E. P. Grand Jury

Howard Maxon, of 701 La Cruz road, was named foreman of the November term grand jury sworn in today by District Judge William E. Ward.

After a brief organizing session the grand jurors adjourned until November 14.

Other members of the grand jury are William Marshall of 3004 East Missouri street, Mrs. Gregory Ramsey of 5517 Paraguay street, Ramon Gomez of 4006 Clifton street, Mrs. Robert H. Cutler of 520 Linda Lane, Mrs. Joe Salas of 1121 Puerto Rico street, Lewis K. Thompson of 4921 Meadowlark road, Mrs. Granville M. Green of 5010 Montoya street, George C. Staten of 919 East Sollege street, Mrs. Lina R. Markham of 4429 Huaco street, Al Hoffman of 1218 Stockwell street and E. H. Lowenhaupt of 7948 Craddock loop.

Space Traveling Dog Aboard Russian Satellite

By Associated Press
MOSCOW, Nov. 4.—The Soviet Union reported today that its space-traveling dog was faring well inside the half-ton rocket satellite circling the earth just over 1000 miles out in space.

Moscow radio said the small, fluffy-haired passenger inside Sputnik II survived the shock of being blasted into space and her breathing, heartbeat and blood pressure were normal.

Air Conditioned

Housed in an air-conditioned casing the dog hurtled around the earth at a speed of 17,840 miles an hour.

Signals from two radios in the satellite are sending scientific data about the dog's reactions and space conditions, the Russians said. Monitors picked up a "beep, beep" on one frequency and a hissing sound from another.

As the spectacular achievement signaled the opening of the era of space travel, a Soviet scientist hinted the dog may parachute safely back to earth.

Apes Are Next

The Soviet Communist Party newspaper Pravda said that Soviet scientists may send apes up in future satellites to study biological effects of space travel.

Pravda added that such rapidly breeding small creatures as rodents, mollusks and insects also may be sent aloft. This, the article said, will give a "good possibility for genetic studies."

The Russians introduced the dog to a radio audience recently and said she was one of several which had been sent up in rockets and parachuted to earth in training for the satellite launching.

TW Jinx Upsets Football Guessers

Texas Western's jinx of never beating Hardin-Simmons University at Abilene still holds true after the Miners lost to the Cowboys 33-20 Saturday night.

And the result of that game helped hex the entrants in the Herald-Post's \$500 Football Contest last week. The Cowboys win was one of the big upsets on the card.

The 21-2 tie between Iowa and Michigan was a big goal line obstacle, too. Some of the upsets that proved troublesome included S. M. U.'s 19-12 win over Texas.

Scores of Games

- Hardin-Simmons 33, TWC 20.
- Texas Aggies 7, Arkansas 6.
- T.C.U. 19, Baylor 6.
- S.M.U. 19, Texas 12.
- Auburn 13, Florida 6.
- Purdue 21, Illinois 6.
- So. Calif. 19, Washington 12.
- Penn State 27, West Virginia 6.
- Alabama 14, Georgia 13.
- Iowa 21, Michigan 21.
- Oregon 27, Stanford 26.
- Navy 20, Notre Dame 6.
- Michigan State 21, Wisconsin 7.
- Tennessee 35, North Carolina 6.
- Kansas 14, Nebraska 12.

Purdue's 21-6 triumph over Illinois, Alabama's 14-13 victory over Georgia, Oregon's one-point win over Stanford, 27-26, Navy's 20-6 setback of Notre Dame and Kansas' 14-12 edging of Nebraska.

The Iowa-Michigan tie was not wholly unexpected. Many of the experts rated it a dead even game. Consequently many of the Herald-Post's (Continued on Page 4, Col. 1)

WINNERS PRACTICE—William Jenkins and Katie Sue O'Neill, winners of The Herald-Post's Circus Clown Contest, practice putting on make-up. They will appear in the circus as clowns Tuesday.

Boy and Girl Selected As Top Circus Clowns

A 14-year-old boy who wants to be a youth counselor and a girl of 11 who wants to be a teaching nun, won The Herald-Post's Circus Clown Contest.

They will appear in the opening parade, made up as clowns, in the Ringling Brothers, Barnum and Bailey Circus at 3:30 p. m. Tuesday in the Coliseum.

The winners are Katie Sue O'Neill and William Jenkins.

Biggest Thrill

"This is the most exciting thing that's ever happened to me!" Katie exclaimed.

"Say, this is swell!" William said when he was informed he'd won. He is an eighth grader at Magoffin Junior High School.

William has not only had a lot of experience in trampolining and tumbling but has also taught them at Recreation Ranch where he worked as counselor this summer.

Bright-eyed Katie Sue, a sixth grade student at St. Pius X, who gets straight "A's," explained how she approached the contest.

"I read every single word about it," she said. "Then I slept on it. I think that always helps—then I wrote my sentence."

Switches Careers

"When I was young," she added, "I wanted to be a singer. But now I've decided to be a teaching nun."

Katie, the daughter of Mr. and Mrs. Edward P. O'Neill of 6144 Tesuque road, gives marionette and puppet shows for charity.

"I'm going to have a lot of fun," William said. "I always enjoy the stunts the clowns do." He is the son of M/Sgt. and Mrs. William M. Jenkins of 4908 Guadalupe drive.

Judges decided William and Katie's entries in the Circus Clown contest were the best of all received.

Judges had a hard time trying to pick the best entries because there were so many good ones.

They finally decided to give free tickets to 26 boys and girls instead of 20 as originally announced.

The rest of the winners who received free tickets to the opening performance, their ages and schools follow:

Armando Gomez of 2120 Bassett (Continued on Page 4, Col. 4)

Order Arrest Of Would-Be Jurors

District Judge William E. Ward slapped fines of \$10 each on 38 absent veniremen and ordered their arrest by the sheriff's department as the trial of Eduardo Robles on a charge of rape began today.

Robles is one of three men charged with repeatedly raping a 15-year-old high school girl who told officers she was kidnapped as she got off a bus on her way home on the night August 28.

Trials of the other two defendants, Amador Holguin and Salvador Salcido, are set for later dates during the fall term of court.

The girl, in a statement to police, said one of the men forced her to enter an automobile and then drove out on a desert road where all three took turns assaulting her. She said she walked all the way from the Five Points vicinity, where they let her out of the car, to the police station to report the attacks.

The prosecution, as it began a questioning prospective jurors, excused those who held conscientious scruple against infliction of the death penalty.

The unexplained absence of 36 persons, more than 10 per cent of the veniremen called, caused Judge Ward to crack down on such conduct. District Clerk J. W. A. Johnson said a percentage of those who failed to answer in court Monday probably will be found to have moved away from the city or died.

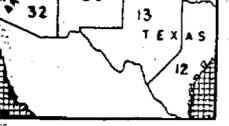

Sputnik II Due Over Texas, N.M.

By Associated Press
WASHINGTON, Nov. 4.—The Naval Research Laboratory put out a timetable listing various points in the United States which it expects Sputnik II to pass over later today.

The estimates, covering three circuits of the earth by the Soviet earth satellite, were based on trackings made by radio apparatus set up in connection with the U. S. satellite programs, Project Vanguard.

The timetable, all times Mountain Standard, includes: New Mexico, 3:11 and Texas, 3:13.

Five-Day Weather

DISTRICT 13

Temperatures near normal. Normal minimum 32-44 north and 44-54 south. Normal maximum 62-72. Warming trend early part of week and cooler Thursday or Friday. Precipitation heavy in showers through about Friday.

DISTRICT 12

Temperatures near normal extreme south Texas and 3-5 degrees below normal elsewhere.

DISTRICT 28

Temperatures will average near or a little above seasonal. Warmer through middle of week.

DISTRICT 31

Occasional showers with snow in mountains till Wednesday and again near the weekend. Temperatures below normal, warming to near normal near end of week east portion.

DISTRICT 32

Few showers in vicinity of mountains till Wednesday and again about Friday and Saturday. Temperatures averaging near normal except slightly below at first of period.

LITTLE LIZ

You sometimes wonder why anyone would want a key to the city — as wide open as most of them are.

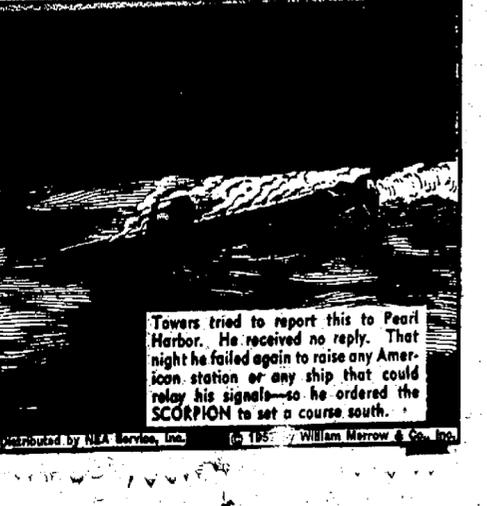

On The Beach

Here is the first installment of our serialized adaption of the most talked of novel of the year, Nevil Shute's "On The Beach," the shocking story of how World War III could start. Follow the exciting developments through the daily picture strips in The Herald-Post.

Dwight L. Towers, captain of the atomic-powered submarine USS SCORPION, was on patrol when the war began. Near two Jims, he upped periscope and found the horizon, in all directions, dark with radioactive dust.

Towers tried to report this to Pearl Harbor. He received no reply. That night he failed again to raise any American station or any ship that could relay his signals—so he ordered the SCORPION to set a course south.
